

IN THE CLAIMS

Please amend the claims as follow:

1-14. Canceled

15. (Original) A method of manufacturing a flexible display panel comprising:
depositing a plurality of blocks onto a flexible layer, each of said blocks
comprising a circuit element for driving a picture element; and
coupling a receiver to the plurality of blocks on the flexible layer.

16. (Original) The method of claim 15, wherein said flexible display panel conforms to
a desired shape of an object when said flexible display panel is attached to said object.

17. (Original) The method of claim 15, wherein each of said shaped blocks comprises
an active circuit element which drives a picture element.

18. (Original) The method of claim 15, further comprising:
coupling a display generation substrate to said flexible layer.

19. (Original) The method of claim 15, wherein said flexible display panel comprises
an active matrix display backplane which comprises at least one electrode for each picture
element.

20. (Original) The method of claim 15, wherein said flexible display panel is conformal.
21. (Original) The method of claim 15, wherein the flexible display panel has an organic light emitting diode.
22. (Original) The method of claim 15, wherein the flexible display panel comprises upconverting phosphor.
23. (Original) The method of claim 15, wherein the receiver is a RF wireless transponder receiver.
- 24-26. Canceled
27. (Original) A method of manufacturing a flexible display panel depositing a plurality of blocks onto a web material defined by a length 50 times greater than its width, each of said blocks comprises an electronic device for driving a picture element; and
coupling a receiver to the plurality of blocks on the web material.
28. Canceled

29. (New) The method of claim 15 wherein said coupling a receiver to the plurality of blocks on the flexible layer further comprises depositing said receiver onto said flexible substrate.
30. (New) The method of claim 29 wherein said receiver causes information on said flexible display panel to change.
